

Disaster Assistance:

Hurricanes, floods, wildfires, droughts, hail, windstorms, tornadoes, and winter storms are natural disasters that have all impacted Texas communities. When these types of Natural disaster events occur, there could be threats to historic and cultural resources. The Texas Historical Commission (THC) can provide assistance to historic properties and resources that are impacted. Visit the THC website to learn more about how the THC can assist and access the disaster resiliency guides for historic property owners and government agencies.
