Summer seal coating to resurface dozens of county roads

FOR IMMEDIATE RELEASE, JULY 16, 2018:

NEW BRAUNFELS — Dozens of roads in subdivisions around Canyon Lake will receive a new seal coat this summer.

As part of Comal County's annual seal coat program, contractor Wagner Company Inc. will resurface more than 42 miles of roads in the following subdivisions:

- Cadillac Canyon, Deep Acres Estates and River's Edge, east of Canyon Dam
- Mystic Shores north of FM 306
- The Oaks, between FM 2673 and Canyon Lake
- The Summit, east of the Guadalupe River between the third and fourth crossings of River Road.

The project is expected to begin by the end of July and be complete by late summer. County crews will do additional seal coating and road maintenance as needed throughout the summer.

“The annual summer seal coat program not only makes county roads easier to drive on, but extends their life and saves taxpayers money in the long term,” said Comal County Engineer Tom Hornseth. “Although we don’t anticipate major disruptions, we appreciate residents’ patience and consideration while these roads are recoated.”
