Probable case definition

“Probable cases” is a category established by the Texas Department of State Health Services to describe those who do not have a positive PCR test for COVID-19, but meet two of the following three criteria:

- A positive quick-result antigen test
- Experiencing COVID-19 symptoms
- Close contact with a confirmed positive COVID-19 case

A probable case is treated identically to a confirmed case and counts toward the county’s positivity rate and total case tally.
