Under 20	3
20's	5
30's / 40's	11
50's / 60's	11
70 and older	2

On Tuesday, Comal County hospitals reported caring for 13 COVID-19 patients; of those, four are in intensive care and two are on ventilators. Not all of these patients are necessarily county residents; likewise, not all county residents hospitalized with COVID-19 are in Comal County hospitals.

TSA P percentage today is 4.13%.

As of Tuesday morning, Public Health has received reports of the following test information:

- 68,515 tests conducted
- 5,046 confirmed cases
- 4,510 probable cases
- 21 suspect cases

The seven-day Molecular positivity rate for Tuesday in Comal County is 22.07%.

The seven-day Antigen positivity rate for Tuesday in Comal County is 3.72%.

Of the 9,577 confirmed and probable COVID-19 cases in Comal County, the location breakdown is:

Location:	Number of cases total:
New Braunfels (Includes Eastern and Central Comal Co.)	6,868
Western Comal County (Includes Bulverde and Spring Branch)	1,393
South of Canyon Lake	548
North of Canyon Lake	424
Southern Comal County (Includes Garden Ridge and Schertz)	301
Fair Oaks Ranch	43

The Comal County COVID-19 Vaccine Standby List is now open.

Residents interested in receiving a COVID-19 vaccine, who meet criteria in Phase 1A, Phase 1B and Phase 1C of the State of Texas vaccination plan, can visit www.co.comal.tx.us to register.

Registering online is the best option for residents because phone resources are limited.

Those who do not have computer access or need assistance can call 830.620.5575.

Vaccines will be distributed to the public as they are received by Comal County and according to all state distribution guidelines.

Probable case definition

“Probable case” is a category established by the Texas Department of State Health Services to describe those who do not have a positive PCR test for COVID-19 but meet two of the following three criteria:

- Meets clinical criteria AND epidemiologic linkage with no confirmatory laboratory testing performed for SARS-CoV-2.
- Meets presumptive* laboratory evidence.
 - Presumptive* laboratory evidence:
 - Detection of SARS-CoV-2 by antigen test in a respiratory specimen
- Meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

A probable case is treated identically to a confirmed case and counts toward the County’s positivity rate and total case tally.

Suspect case definition

A “Suspect case” meets supportive laboratory evidence with no prior history of being a confirmed or probable case. It is also counted towards the total case tally.

Supportive Laboratory Evidence means:

- **Detection of specific antibody in serum, plasma, or whole blood**
- **Detection of specific antigen by immunocytochemistry in an autopsy specimen.**
