Fair Oaks Ranch	52

The Comal County Health Department administers the Moderna Vaccine, which is used for those 18 years of age and older.

Those interested in receiving a vaccine can schedule an appointment by visiting www.mycomalcounty.com

Vaccines will be distributed to the public as they are received by Comal County and according to all state distribution guidelines.

The FDA approved the Pfizer COVID-19 vaccine to be given to children ages 12-15. The Centers for Disease Control and Prevention’s vaccine advisory committee has scheduled a meeting Wednesday to review the shots for children and is expected to approve using the vaccine for adolescents. Comal County’s Public Health Department has plans to distribute the Pfizer vaccine for the new age group in the near future.

Probable case definition

“Probable case” is a category established by the Texas Department of State Health Services to describe those who do not have a positive PCR test for COVID-19 but meet two of the following three criteria:

- Meets clinical criteria AND epidemiologic linkage with no confirmatory laboratory testing performed for SARS-CoV-2.
- Meets presumptive* laboratory evidence.
 - Presumptive* laboratory evidence:
 - Detection of SARS-CoV-2 by antigen test in a respiratory specimen
- Meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

A probable case is treated identically to a confirmed case and counts toward the County’s positivity rate and total case tally.

Suspect case definition

A “Suspect case” meets supportive laboratory evidence with no prior history of being a confirmed or probable case. It is also counted towards the total case tally.

Supportive Laboratory Evidence means:

- **Detection of specific antibody in serum, plasma, or whole blood**
- **Detection of specific antigen by immunocytochemistry in an autopsy specimen.**
