Comal County residents can now self-schedule COVID-19 vaccines; Vaccine Standby List no longer needed

FOR IMMEDIATE RELEASE: April 27, 2021

NEW BRAUNFELS — With more than 96,000 COVID-19 vaccines administered in Comal County, the County Vaccine Standby list will close effective Wednesday, April 28 at 12:01 am.

"There isn't a need for a standby list anymore because the vaccine is more readily available," said Comal County Judge Sherman Krause. "Instead of a standby list, people can skip that step and go directly to schedule their own appointment."

Comal County held several very successful mass vaccination clinics over the last few months, helping the most vulnerable residents get vaccinated. To date, Comal County Public Health has successfully administered over 30,000 Modera COVID-19 vaccines. With supply now outpacing demand and eligibility open to all adults, the County is adjusting how clinics are scheduled.

"The success of our efforts paired with our local pharmacies and vaccine providers have made sure that there is availability of vaccines to everyone who wants one," said Cheryl Fraser, Director of Comal County Public Health. "It is a great success that we are not seeing the demand for the vaccine like we were in the past few months. Even with the stand-by list going away we want the community to know that we are still here for those who have yet to get the vaccine. Our Mass Vaccine clinics will continue at the New Braunfels Civic & Convention Center the next couple of months to make sure that vaccine is accessible to them."

Residents are encouraged to visit www.mycomalcounty.com for information and updates on any upcoming clinics. Anyone interested in receiving a COVID-19 vaccine can visit www.i-info.com/registry/registry.aspx?evt=D3757753D854466EA753D00A5214CA87 to schedule an appointment. Just click "next" to answer a few questions and choose your appointment day and time.
